

ZEUS OPERATIONS SUPPORT PTY LTD

Business pitch

ACN 702 955 735 | Mining • Earthmoving • Civil | Australia-wide

Zeus is available for contract recognition of prior learning (RPL) assessment and remote evidence support for registered training organisations (RTOs) in mining, earthmoving and civil construction. We also offer day-shift relief operator and supervisor supply.

Contract RPL assessment and remote support

Assessor credential: TAESS00019 Assessor Skill Set.

TAESS00019 meets the assessment-only credential requirement, including making assessment judgements. Contract RPL work requires an RTO agreement and verification of relevant vocational competency, current industry and assessment skills, unit-specific assessor requirements and approved unit scope.

- Review RPL portfolios and workplace evidence against agreed units and assessment requirements.
- Make and document RPL assessment judgements within the engaging RTO's assessment system and approved scope.
- Coordinate candidate follow-up, evidence gaps and assessment records.
- Provide relief assessor capacity for defined assignments, leave cover or overflow.

Remote evidence review is offered where suitable. Required practical demonstrations, observations and other assessment conditions still apply. Zeus is not an RTO and does not issue nationally recognised qualifications or Statements of Attainment; certification is the engaging RTO's responsibility.

Relief operators and supervisors

Day shift only. Support can be scoped for planned leave, short-term cover and project work, with qualified and ticketed personnel matched to the role:

- Excavator, loader, grader, dozer and rigid or articulated haul truck operators.
- Water cart, roller and multi-skilled mobile plant support.
- ROM and frontline operational supervision.

Each placement is subject to availability, verification of relevant qualifications, tickets and machine experience, and completion of site requirements. Applicable licensing, insurance and any statutory appointment requirements must be confirmed before mobilisation.

Practical operating experience

Our service focus draws on hands-on experience in ROM and stockpile operations, crusher and plant feeding, haul-road maintenance, tailings dams, compaction and frontline supervision.

Discuss a requirement

For assessment support, share the units, evidence workload and required timing. For relief coverage, share the site, roles, equipment and dates. Zeus will confirm the proposed scope, availability and a tailored quote before engagement.
